Agile Model

approach where work
in small, iterative

- Iterative Model cycle called spirit
- Widely used

4 manifesto...

1] Working software
- It means of communication

2] Customer collabration
- connecting with customer / if
  customer changes adapt.

3] Respond to change
- We are changing

4] Individual and Interaction
- less documented
- initial requirement

✡✡ Advantages of Agile

- Faster delivery of function software.

- Higher customer satisfaction
- Flexibility testing for changing requirements.
- Continuous testing and quality assurance.
- Better risk management

✨ Disadvantages:

- Requires constant customer involvement
- Less predictability in cost and time if requirements keep changing.
- Needs experienced team members for effective collabration.
